TOP 5 PRODUCTS

Discover our safe patient handling solutions widely used in acute settings and available through the NHS Supply Chain.

Disposable High Easy

Fixing: Loops and Clips

This single-use sling combines safety and hygiene to support improved clinical outcomes while maintaining high standards of patient care and infection control. The design offers full-body support, patient comfort and security during transfers.

Disposable Stability Aid

A practical solution for radiographers who need to safely and efficiently support patient's post-therapy. Specifically crafted for use around sensitive imaging and radiotherapy equipment, it offers a safe, cost-effective alternative to traditional manual handling methods.

In-Situ High Easy

Fixing: Clips

Compatible with most clip-style hoists via D'Anserclip® universal fixings, this sling is manufactured in a 3D compression spacer fabric (Superfine Plus) and can remain in place after transfers following a risk assessment. Providing full-body support with an adjustable head support and removable stiffeners, it's suitable for both temporary and long-term use.

Repositioning Sheets

A versatile tool to support safe patient repositioning, lateral transfers, and pressure management. It helps to maintain skin integrity and reduce risks associated with manual handling. Suitable for various clinical settings, it offers efficient care delivery and patient safety.

Stand Assist

Fixing: Loops

This sling offers a reliable and comfortable solution for assisted standing transfers. It features a fully padded design for comfort, and a hook-and-loop fastening with clunk-click buckle for added patient security.

BARIATRIC SOLUTIONS

Explore our solutions designed to support caregivers in providing safer transfers and care for persons of size.

The **ULTIMATE** Bariatric Patient Transfer Solution

Bariatric In-Situ Comfort Care

An innovative sling with unique features and tailored shaping to support varying plus-sized body shapes.

Key Features

- Weight-bearing pommel with multiple attachment options for adjustability.
- Crafted in our exclusive COOLMAX freshFX® EcoMade fabric with antimicrobial properties to reduce bacteria and help keep patients cool and dry.
- Designed and trialled in collaboration with bariatric specialists to ensure full support, comfort and safety.

Bariatric Fixed Lifter

A state-of-the-art solution tailored to meet the needs of bariatric patients and caregivers.

Key Features

- Motorised 360° rotation for excellent manoeuvrability in tight spaces.
- Long-lasting battery (up to 5 years) with built-in constant charging, which means that the lift is always ready to use.
- Unique 4-point tilting spreader bar to help provide improved positioning and comfort during transfers.

Air Comfort Deluxe V2 (Maxi)

A patented airgonomic seating system providing superior pressure redistribution and an unmatched level of comfort.

Key Features

- Electric adjustable back recline, seat tilt and raising leg rest for optimum positioning.
- Esense Power Drive Kit option available to effortlessly propel seated users.
- Drop-down arms and adjustable wings for easier side transfers and cleaning, to comply with infection control regulations.
- 3 locking castors and one directional locking castor for ease of movement.

“

From the antimicrobial fabric to the thoughtful sling shape and well-considered strap placement, the overall Silvalea Bariatric sling design provides the most comfortable experience, with every detail clearly well thought out. The consistent colourway across sizes is also a thoughtful, inclusive, and person-centred touch. It's great to see patients considered in this way, without being singled out by different colours. ”

Tracey Carr - Independent Bariatric Consultant
