

UltraSlide® Bottom Sheet

SIL-PTD-LS

- Replaces a standard fitted bottom sheet, modified with a low-friction taffeta panel down the centre
- The Swift® In-Bed Repositioning System features two elements, the Swift® Slider and the UltraSlide® Bottom Sheet, which work together to support repositioning & turning manoeuvres in bed
- Carbon fibres integrated into the centre panel reduces static build-up
- The stretch SleepKnit® construction means the UltraSlide® Bottom Sheet is flexible enough to fit most healthcare mattresses including profiling beds & alternating air pressure reducing mattresses
- Can also be used in isolation of the Swift® Sliders to encourage more independent movement.
