15 JAN

## Silvalea's Most Popular Slings

10:30 - 11:30 (GMT)

This session will highlight our bestselling sling styles worldwide and explain the key reasons for their success:

- Covering our popular standard slings for more general scenarios
- Showcasing our top two In-Situ designs and discussing the benefits to both patient and carer
- Demonstrating each of these slings and showing why they're successful for many situations
- Discussing the fabrics we have available and highlighting their benefits

## Products for Paediatric Care

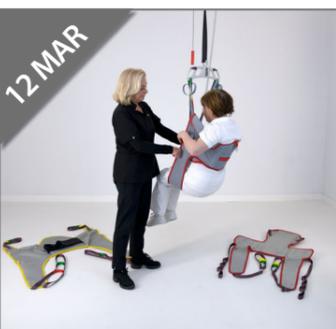

10:30 - 11:30 (GMT)

This session features our most widely used paediatric products demonstrated to be effective across various scenarios:

- Looking at our most popular products for children from simple to complex
- Showcasing a selection of harnesses used for rehabilitation and safer handling
- Sharing our solutions for those with more challenging behaviour
- Highlighting the options that can be used for manual transfers

12 FEB

12 MAR

## Top Tips & Selection for Hygiene Transfers

10:30 - 11:30 (GMT)

This session explores the sling styles that will successfully enable hygiene or toileting transfers for various patient scenarios:

- Demonstrating our variety of sling solutions from standard to complex scenarios
- Gaining insight on the suitability and benefits of each style
- Sharing tips and techniques when applying a standard dress sling to ensure maximum support
- Addressing the challenges and highlighting potential safety implications

## Choosing Slings for Amputees

10:30 - 11:30 (BST)

This session helps to gain insight and knowledge on the sling solutions that we have available for patients with amputations:

- Looking at the sling styles which are suitable for amputee scenarios
- Discussing solutions for different limb lengths, from long to through hip amputations
- Explaining what accessories can be added for extra support and patient comfort
- Exploring the different fabric options for optimum limb comfort, bathing, etc.

2 APR

14 MAY

## Simplifying Sling Shapes

10:30 - 11:30 (BST)

This session goes back to basics to help simplify and better understand the main standard sling shapes and their uses:

- Explaining the advantages and limitations of each standard sling style
- Gaining insight into the comparable versions of each sling shape
- Demonstrating the benefits of various additions available
- Looking at our fabrics available for standard slings

## In-Situ Sling Solutions

10:30 - 11:30 (BST)

This session identifies the suitability of In-Situ slings and goes into detail on the styles which are successful for different situations:

- Showcasing the styles that are more suitable and tailored to be left in-place
- Discussing the implications of leaving a sling in-place for extended periods and risk assessments
- Looking at our exclusive fabric technology options and what situations they are best used for
- Demonstrating the accessories available and explaining their benefits

11 JUN

## Additional Sessions Available

- **Bespoke OT Groups** – Available upon special request and tailored to the needs of individual group
- **E-Assessments** – Our in-house assessor is available to help find sling solutions for your complex scenarios

## Training Attendee Testimonials...

*"Delivered in a clear and organised way, and always good to learn new things, thank you. I've only just discovered the training videos so I'm looking forward to increasing my knowledge."*

**Occupational Therapist, Adult Social Care**

*"Explaining the 'physics' of how the slings work is really valuable - I would've really benefitted from this kind of training at the start of my OT career quite a while ago. Explaining condition suitability for each sling is really helpful. I only wish I had done this session years ago."*

**Clinical Lead Occupational Therapist, Adult Learning Disabilities**

*"Amanda is an excellent teacher. She is always clear, and ensures any questions are answered. The use of the posters and demonstrations of how to apply slings was beneficial to aid understanding. Thank you so much for putting these sessions on. They have been a huge help to my clinical practice in providing knowledge and increasing confidence."*

**Primary Care Occupational Therapist, NHS**

*"Informative and presented really well, especially being able to demonstrate how the slings were able to support different types of conditions. I learnt some excellent tips and new products, I will be sharing with my colleagues and hope to use in my practice."*

**Occupational Therapist, County Council**
